

## Design Glass Radiation Panel

The Design Glas Panels are available in different colours:

- Red
- Black
- Green
- White
- Mirror

The Design Panels have a very modern, classy look and apply to all the CE standards. It is a Class II IP44 product.

We advice a thermostat of OJ Electronics, the OCD4 as a control unit.

There is a possibility to install a solid stainless steel towel rail on the Panels. These rails are available. This looks great in your Bathroom. An example is exposed on the picture

Type	Measurement LxBxD	Power	Weight	Colours	Voltage
DGP (M) 300	700x500x12	300W	14 kg	Red,Black,Green,White, Mirror	230V
