

Ecofloor CableKit Do-it-yourself package

The Ecofloor Cable Kit contains the following parts:

1. heating cable on a reel
2. thermostat incl. floor sensor
3. mould to appoint the loops, with which you can determine the capacity: 100W of 160W p/m²
4. protection case for the floor sensor
5. double sided tape

The Ecofloor Cable Kit Do-it-yourself package is a floor heating that is suitable for every room and can be installed in various capacities. This varies from 100 to 160 Watts per m2.

The Ecofloor Cable Kit is especially suitable for rooms where a lot of diversions have to be made.

The specifications of the Ecofloor Cable Kit are the following:
