

Ecosun radiation panels

The radiation panels can be divided in two groups:

- The low temperature panels.
- The high temperature panels.

The panels give off radiation heat and therefore not only heat the air like warm-water radiators or gas heaters do. The Ecosun panels heat the objects and this way

of heating is the same as the heat we receive from the sun. The radiation heat doesn't warm the air, therefore

no replacement of air and dust will take place. This produces a lot of advantages for

laboratories, antique shops, bookstores, etc. Also for people who suffer from a dust

allergy, the Ecosun heating panels can be the perfect and welcome solution as a heat

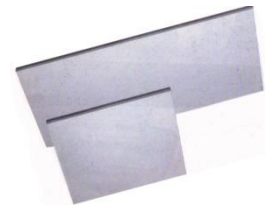

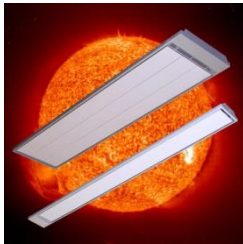

source. Next to all these advantages this system is also very economically in comparison

with the traditional systems. You will save about **20%** energy.

The low temperature panels are made in measurements that are suitable for utility- and

home building. With the delivered clamp they of course can be fixed on a regular ceiling

also.

Specification of the low temperature panels

Articlenr.	Type	Measurements	Capacity	Installation Height
16001	E300	592x592x30	300 W IP45	2 -3 m
16002	E600	1192x592x30	600 W IP45	2,7-3,8 m
16003	E700	1192x592x30	700 W IP45	2,7-3,8 m
16004	E700EX	1192x592x30	700 W IP65	2,7-3,8 m

Specification of the high temperature panels

(installation height, total space: 5-8 m., zone 3,5- 4,5 m.)

Articlenr.	Type	Measurements	Capacity	Weight
16005	ES09	1500x130x50	900 W	5,8 kg.
16006	ES12	1500x130x50	1200 W	5,8 kg.
16007	ES18	1500x231x50	1800 W	9,9 kg.
16008	ES24	1500x231x50	2400 W	9,9 kg.
16009	ES30	1500x332x50	3000 W	13,9 kg.
16010	ES36	1500x332x50	3600 W	13,9 kg.
